

US-98/SR-158 Extension Projects Safe 98

SR-158 extension from east of Lott Rd. to Schillinger Rd: Crews completed the concrete pours of the deck and end slabs for the bridge over Rogers Rd. They placed steel for the bridge rail as well. Crews have placed crushed aggregate on the roadbed east of Seabury Creek bridge to prepare it for asphalt.

SR-158 extension from east of Glenwood Rd. to west of Lott Rd: Crews drove piles for the bridge abutments at McCrary Rd. and have begun work to construct the retaining wall. Crews began placing surcharge material at the east abutment for a bridge over Collins Creek.

Major Milestones

Other utility, drainage, and construction work not listed here will be performed simultaneously along with these items. The final wearing surface and permanent stripe and markings are added prior to the completion of the project.

- Extend the eastbound bridge over Big Creek **Complete**
